# FABRICATION

# FABRICATION

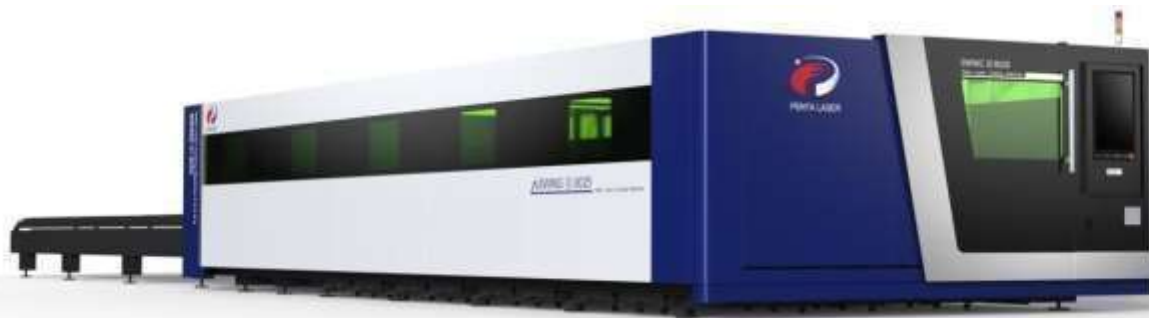

Proper design are used of tools with machinery creates in a repeatable Form. Machinery can regulate forcemagnitude and direction.

Metal fabrication is the creation of metal structures by cutting, bendingand assembling processes. It is a value-added process involving the creation of machines, parts, and structures from various rawmaterials.

We are fabricating components using SPOT/ARC/MIG welding.Special arrangements are available for other different fabrication process of MS & SS. Machine-based forming can combine forming and welding to produce lengths of fabricated sheeting.
